

### ADVANTAGES

- Optional particulate filter section, fan motor, and exhaust stack
- Safe and easy routine maintenance access
- Predicted removal efficiency and lifetime by Camfil's proprietary software
- Contact time range of 1 second
- Wide range of air flows from 8,000 - 62,000 CFM (14,000 to 105,000 m<sup>3</sup>/h)
- Highly reliable performance

<b>Application</b>	For those applications where plant reliability and elimination of odors and toxic gases from industrial EXHAUST air streams is essential for operational security and regulatory compliance.
<b>Frame</b>	Stainless steel; Steel, painted
<b>Media</b>	Activated Carbon; Impregnated Activated Carbon; Impregnated Activated Alumina
<b>Max Temperature (°C)</b>	90
<b>Min Temperature (°C)</b>	-21
<b>Installation Options</b>	Ducted units typically installed on a concrete pad or roof assembly. See manual for instructions. Power is required if supplied with a fan and/or control panel.
